

CCNSG Safety Passport

The objective of this course is to prepare participants for employment and support those new to the sector in developing their knowledge, ultimately leading to the achievement of relevant qualifications.

These qualifications equip participants with the knowledge and understanding of the sector, making them ideal for those who want to learn more about the industry. They are relevant across a variety of work environments.

What is the CCNSG Safety Passport?

All work exposes people to hazards, this is especially true for the engineering construction industry (ECI). That's why it is imperative everyone working on site is correctly trained. Health and safety training

helps develop a positive health and safety culture and is one of the key contributors in reducing accidents and lost-time incidents on sites.

Suitable for all workers in the industry, the Engineering Construction Industry Training Board's (ECITB) quality-assured CCNSG Safety Passport is a two-day course that gives delegates enhanced health and safety awareness.

The CCNSG course is delivered through face-to-face training, delegate discussion and shared experience, followed by a knowledge test.

Qualifications & CPD Certificates:

- CCNSG Safety Passport
- Level 1 Award in Health & Safety in a Construction Environment
- First Aid L3
- L2 Manual Handling
- CIEH Working at heights
- Fire Warden
